What is this product?

Type

This product is a share class of AXA INVESTPLUS BONDS SATELLITE, itself a sub-fund of AXA INVESTPLUS, an investment company with variable share capital and is governed by Luxembourg law.

Objectives

Investment objective The Fund invests mainly in other funds invested in turn in worldwide bond markets. For performance comparison purposes only, the Sub-Fund uses a benchmark composed of 33.33% of the performance of the High Yield index (Morningstar Global High Yield Bond TR Hedged EUR Index), 33.33% of the Convertibles index (Refinitiv Global Focus Hedged Convertible Bond Index EUR), 23.34% of the JPM USD EMBI Global Diversified Hedged EUR Index and 10% of the JPM GBI EM Global Diversified EUR Index. The Fund may evolve in a way that diverges substantially from world bond markets.

Investment policy The Fund is an actively managed fund of funds. Selection of investments follows a 'bottom up', research-based approach determined by the Investment Manager, seeking less constrained funds whose performance may diverge significantly from their benchmarks. The Fund will comprise shares and units in other funds covering mainly the markets for government, corporate investment grade, high yield and convertible bonds, whether traditional or emerging, and which may be exposed (without limit) to non-investment grade, distressed debt securities, and/or defaulted debt securities.

The Investment Manager will use its extensive research (including investment due diligence and analysis, examining both qualitative and quantitative criteria) and market insight to seek out opportunities for outperformance through selection of the best funds available, as determined by the Investment Manager in its discretion.

The Investment Manager may invest up to 30% of the net assets of the Fund directly in other investments (including mainly Fixed- Income Securities).

The Fund may also invest up to 10% of its net assets in bank deposits, money market instruments or money market funds.

The Fund is a financial product that promotes environmental and/or social characteristics within the meaning of article 8 of the Regulation (EU) 2019/2088 of 27 November 2019 on sustainability-related disclosures in the financial sector.

Benchmark use The Fund is actively managed. The Fund is measured against 33.33% of the performance of the High Yield index (Morningstar Global High Yield Bond TR Hedged EUR Index), 33.33% of the Convertibles index (Refinitiv Global Focus Hedged Convertible Bond Index EUR), 23.34% of the JPM USD EMBI Global Diversified Hedged EUR Index and 10% of the JPM GBI EM Global Diversified EUR Index benchmark. The Investment Manager has the freedom to invest in

securities that are not part of the benchmark. The Fund may deviate significantly from the benchmark.

Redemption and Dealing Shares of the Fund may be redeemed on demand, with dealing normally on a daily basis.

Distribution Policy For Distribution share classes (Dis), the dividend is distributed.

Intended retail investor

What are the risks and what could I get in return?

Risks

The summary risk indicator is a guide to the level of risk of this product compared to other products. It shows how likely it is that the product will lose money because of movements in the markets or because we are not able to pay you.

We have classified this product as 3 out of 7, which is a medium-low risk class.

AXA INVESTPLUS BONDS SATELLITE

This rates the potential losses from future performance at a medium-low level, and poor market conditions are unlikely to impact the capacity of AXA Investment Managers Paris to pay you.

Be aware of currency risk. You may receive payments in a different currency, so the final return you will get depends on the exchange rate between the two currencies. This risk is not considered in the indicator shown above.

Performance scenarios

The figures shown include all the costs of the product itself, but may not include all the costs that you pay to your advisor or distributor. The figures do not take into account your personal tax situation, which may also affect how much you get back.

What you will get from this product depends on future market performance. Market developments in the future are uncertain and cannot be accurately predicted.

The unfavourable, moderate, and favourable scenarios shown are illustrations using the worst, average, and best performance of the product over the last 10 years. Markets could develop very differently in the future.

The stress scenario shows what you might get back in extreme market circumstances.

Unfavourable: this type of scenario occurred for an investment between September 2017 and September 2022.

Moderate: this type of scenario occurred for an investment between May 2014 and May 2019.

Favourable: this type of scenario occurred for an investment between February 2016 and February 2021.

What happens if AXA Investment Managers Paris is unable to pay out?

For your protection the fund's assets are held with a separate company, a depository, so the fund's ability to pay out would not be affected by the insolvency of AXA Investment Managers Paris. If the fund is terminated or wound up, the depository would liquidate the investments and distribute the proceeds to investors. You may lose part or all of your investment. You are not covered by any national compensation scheme.

What are the costs?

The person advising on or selling you this product may charge you other costs. If so, this person will provide you with information about these costs and how they affect your investment.

Costs over time

The tables show the amounts that are taken from your investment to cover different types of costs. These amounts depend on how much you invest, how long you hold the product. The amounts shown here are illustrations based on an example investment amount and different possible investment periods.

We have assumed:

- in the first year you would get back the amount that you invested (0% annual return). For the other holding periods we have assumed the product performs as shown in the moderate scenario,
- 10,000 EUR is invested.

Example Investment 10,000 EUR	if you exit after 1 year	if you exit after 5 years (recommended holding period)
Total Costs	526 EUR	1,430 EUR
Annual cost impact*	5.3%	3.0% each year

(*) This illustrates how costs reduce your return each year over the holding period. For example it shows that if you exit at the recommended holding period your average return per year is projected to be 3.5% before costs and 0.5% after costs.
